GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

State Stream Code NO. _____

Notice No. _____

6240

UNITED STATES
DEPARTMENT OF THE INTERIOR
Bureau of Land Management

NOTIFICATION OF EXISTING WATER USE
TO THE STATE WATER RIGHTS BOARD OF THE STATE OF CALIFORNIA

6210

The United States of America, acting by and through the Bureau of Land Management, United States Department of Interior, hereby notifies the Board of the following water requirement(s) on lands withdrawn under Section 1 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269), as amended (Identify the Executive Order, _____)

proclamation, public land order, Secretarial Orders or statutes involved) 1

In California within or near the unnamed wash tributary to Ford dry lake watershed of the Riverside District for federal resource and land management programs administered by the Bureau of Land Management.

(1) The source of water is There is no known surface discharge of water except for intermittent runoff after infrequent, but high intensity rain storms of short duration over Ford Lake watershed (subsurface groundwater only) located in Riverside County, (if named, so state)

California, which source is ~~XXXXXX~~ tributary to interior(closed) basin of Ford (dry) Lake

(2) The point of diversion is: As Wiley Well is now dry and our attempts to redrill it have been unsuccessful there is no diversion at this time, but groundwater is used by desert woodland in wash adjacent to Wiley Well Campground being within the from section or quarter section corner)

NW1/4SE1 of Section 9, Township 8 S., Range 20., (40-acre subdivision) San Bernardino Base and Meridian.

(3) The amount of water use is as follows: (Complete only applicable items)

(a) For diversion and direct application to beneficial use:

_____ cubic feet per second, the diversion commencing _____ and ending _____ of each year.

(b) For diversion, storage, and later application to beneficial use:

_____ acre-feet per annum, to be collected between _____ and _____ of each year.

(4) The water use(s) is (are): The groundwater resource flowing beneath the wash channels maintain a luxuriant growth of Desert Ironwood, Palo Verde and desert woodland species which shelters and forms a scenic backdrop for the campground development and which harbors considerable wildlife. (stock water, fire control, fish culture, etc.)

(5) The place of water use is: Wiley Well Campground within the Chuckwalla Valley Recreation area (Commonly known as _____ or local designation)

In the NW1/4SE1 of Section 9, Township 8 S., Range 20 E., San Bernardino Base and Meridian, Riverside County, California

(6) If water use covered by this notification supplements that covered by a prior notification or by a water right from the State:

(a) The number of such prior notification is: _____

(b) The number of the State (permit) License is: _____

Issued pursuant to application number _____

(7) The water use covered by this notification (commenced) (will commence) in the year _____.

(8) If the water use covered by this notification is by a person or entity occupying public land under a right of way or other permit:

(a) The holder or permittee is: _____

(b) The right of way or permit was issued for the purpose(s) of _____

* The foregoing diversion and use are made pursuant to a withdrawal and reservation of the affected land and resources thereon for federal resource and land management programs administered by the Bureau of Land Management. The date of said withdrawal and reservation is _____ 2/

A map, if available, showing points of diversion and use is attached hereto

Remarks 3/ _____

The United States of America gives this notification to the State in the interest of equity, and does not concede that the State has power to regulate the rights of the United States to use of the water.

Dated this _____ day of _____, 19 _____ JUN 11 1970

UNITED STATES OF AMERICA

By: _____
Noting State Director, California
Bureau of Land Management
United States Department of Interior

1/ This notification is subject to the provisions of the Order of the Secretary of the Interior, Department of the Interior, dated April 1, 1964, and the Executive Order of April 17, 1966, Hot Spring (Executive Order 5305, July 7, 1966) (Check all withdrawal(s) of record or which are subject of fact, or law, exist on the land.)

2/ See 1/ above. This date shown on the order. The effective date can only be date from the date of the order and the first date of the withdrawal.

3/ This is a statement of the facts, which are the basis for the withdrawal, and the first date of the withdrawal.

The Chuckwalla Valley National Recreation Lands have been classified for indefinite retention in Federal ownership for multiple use management by classification order of December 12, 1967 pursuant to the Classification and Multiple Use Act of September 19, 1964 (43 U.S.C. 1411-1418).

The Chuckwalla Valley is an area of extreme aridity such that its groundwater basins are only slowly and very poorly recharged. Further surface diversion of this limited resource would constitute mining of the groundwater. The desert woodlands found in some of the larger wash systems now exist in a very precarious ecological balance and would certainly be adversely affected by withdrawal of their limited water supply by mining. These woodlands provide shelter and scenic backdrop for both Wiley Well and Coon Hollow campgrounds (the latter is located three miles south of the former) and harbor and protect large numbers of desert wildlife (reptiles, small mammals and song and game birds). These woodlands must be protected to conserve the valuable recreation and wildlife resources being managed by the Federal program in the area.
